Why Do You Vote?

Voting is an important right for Americans. Voting is a way for people to say what they want.

One important way to vote is when **you decide who the leaders are in government**. You get to vote for people like the President, Senators, Representatives, Governors, Mayors, and council members. These are elected officials.

Elected officials make decisions that affect the lives of you, your friends, and family members. **Some decisions they make affect people with disabilities** and programs that support people with disabilities to live and work in the community.

Voting happens in Maryland on Election Day.

Parties and Primaries

What are “Parties” in Politics

A political party is a group of people with the same political goals and opinions. A political party works to vote candidates they like into government. In the U.S., we have two main political parties. These are Republicans and Democrats.

There are also a few other Political Parties.

In Maryland, the following Parties are recognized, according to the Board of Elections website:

Democrat

Republican

Libertarian

No Labels Maryland

What is a Primary Election?

The Democratic and Republican Parties are required to use primary elections to choose their candidates for the general election. Although it is up to the parties to decide who may vote in the Primary Elections, generally only registered voters who are affiliated with the Democratic or Republican Parties may vote in their party’s primary election.

Can I Vote In a Primary Election

It depends. Are you registered to vote as a Democrat or Republican? Generally, you must be registered with either the Democratic or Republican Party to vote in the primary election. If there are non-partisan offices (not affiliated with a political party) that are elected in a primary election any voter can vote for these offices. An example could be a school board election. If you are unsure about whether you may vote in a Primary Election, [contact your local board of elections by clicking the link here.](#)
